## VICTORIA FALLS LUNAR RAINBOW

The Lunar rainbow can be experienced for 3 days during full moon at high water levels at the Victoria Falls. Best months are April, May, June and July, August.

What is a Lunar Rainbow? A full moon is bright enough to have its light reflected by raindrops just as is the case for the sun. Moonlight is much fainter, of course, so the lunar rainbow is not nearly as bright as one produced by sunlight but nevertheless a sight worth seeing. Lunar rainbows have infrequently been observed since the time of Aristotle or before.

Full moon dates for 2009

2009: 11 Jan, 9 Feb, 11 March, 9 April, 9 May, 7 June, 7 July, 6 Aug, 4 Sept, 4 Oct, 2 Nov, 2 Dec, 31<sup>st</sup> December.
